Aditya Kushal

- IPL Team
- Stands for Royal Challengers Bangalore

RCB

- Virat Kohli part of RCB

Virat Kohli

- Team named after company liquor brand royal challengers

Royal Challengers

- Have not won till now but finished runner up 3 times.

Runner up Team

Go. Change the world

Beverages,

Fanta,

Coco Cola

Fruit Drinks,

Minute
maid

Energy drink,

Burn

Mineral Drink

Kinley

- Sprite - Neutral
- Coco cola - Party
- Coco cola diet -
For the health
conscious

Beverages

- Minute maid -
Classic, pulpy
and ~~Fasty~~
fruit juices

Fruit juice

- Burn - IF
you want the
energy to
burn some
calories.

Energy drink

- Kinley - When
you want nothing
but the good, old
water.

Mineral water

Temple Run

- Goal of the game is to run from the zombie chasing you.

Run

- Slide your finger to turn right, left, jump and slide.

Controls

- Collect coins to upgrade power ups.

Coins

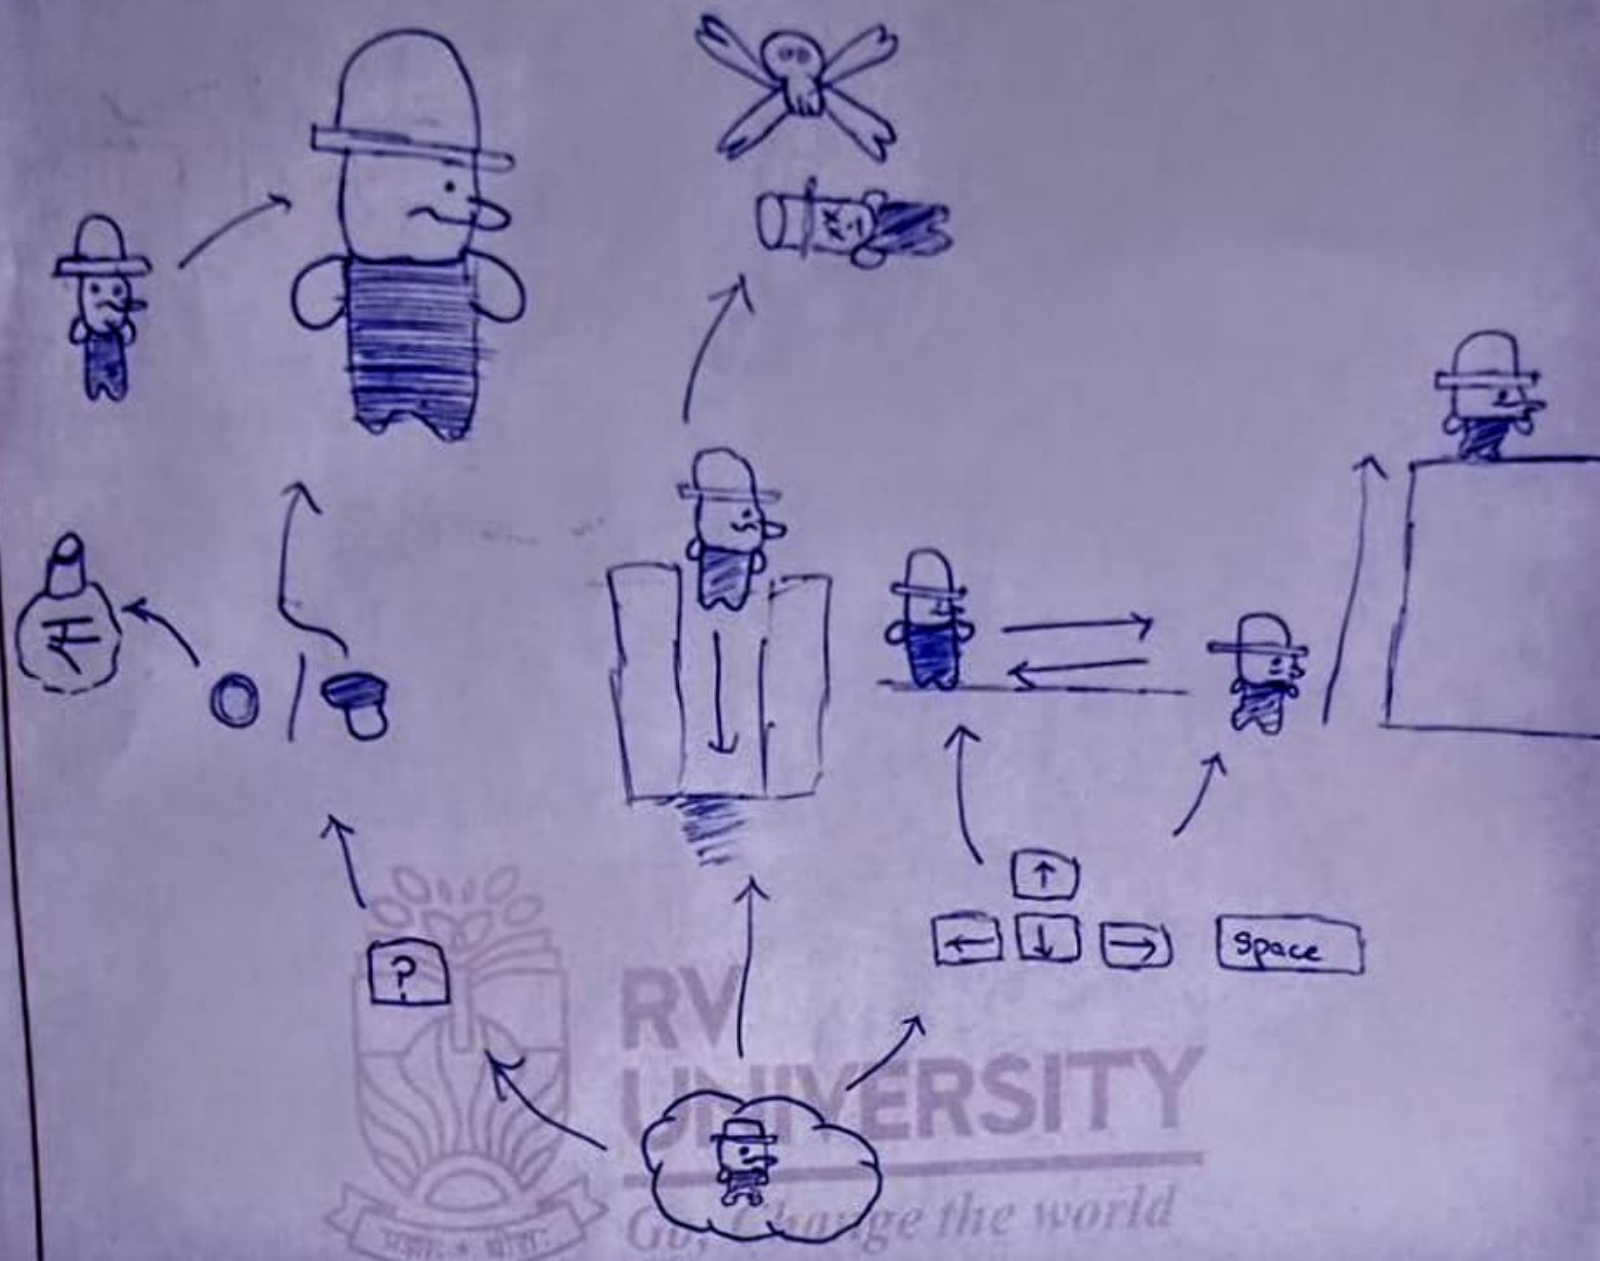

- Use power ups to enhance gameplay.

Power ups

⇒ Play the game and have a successful escape.

Enjoy

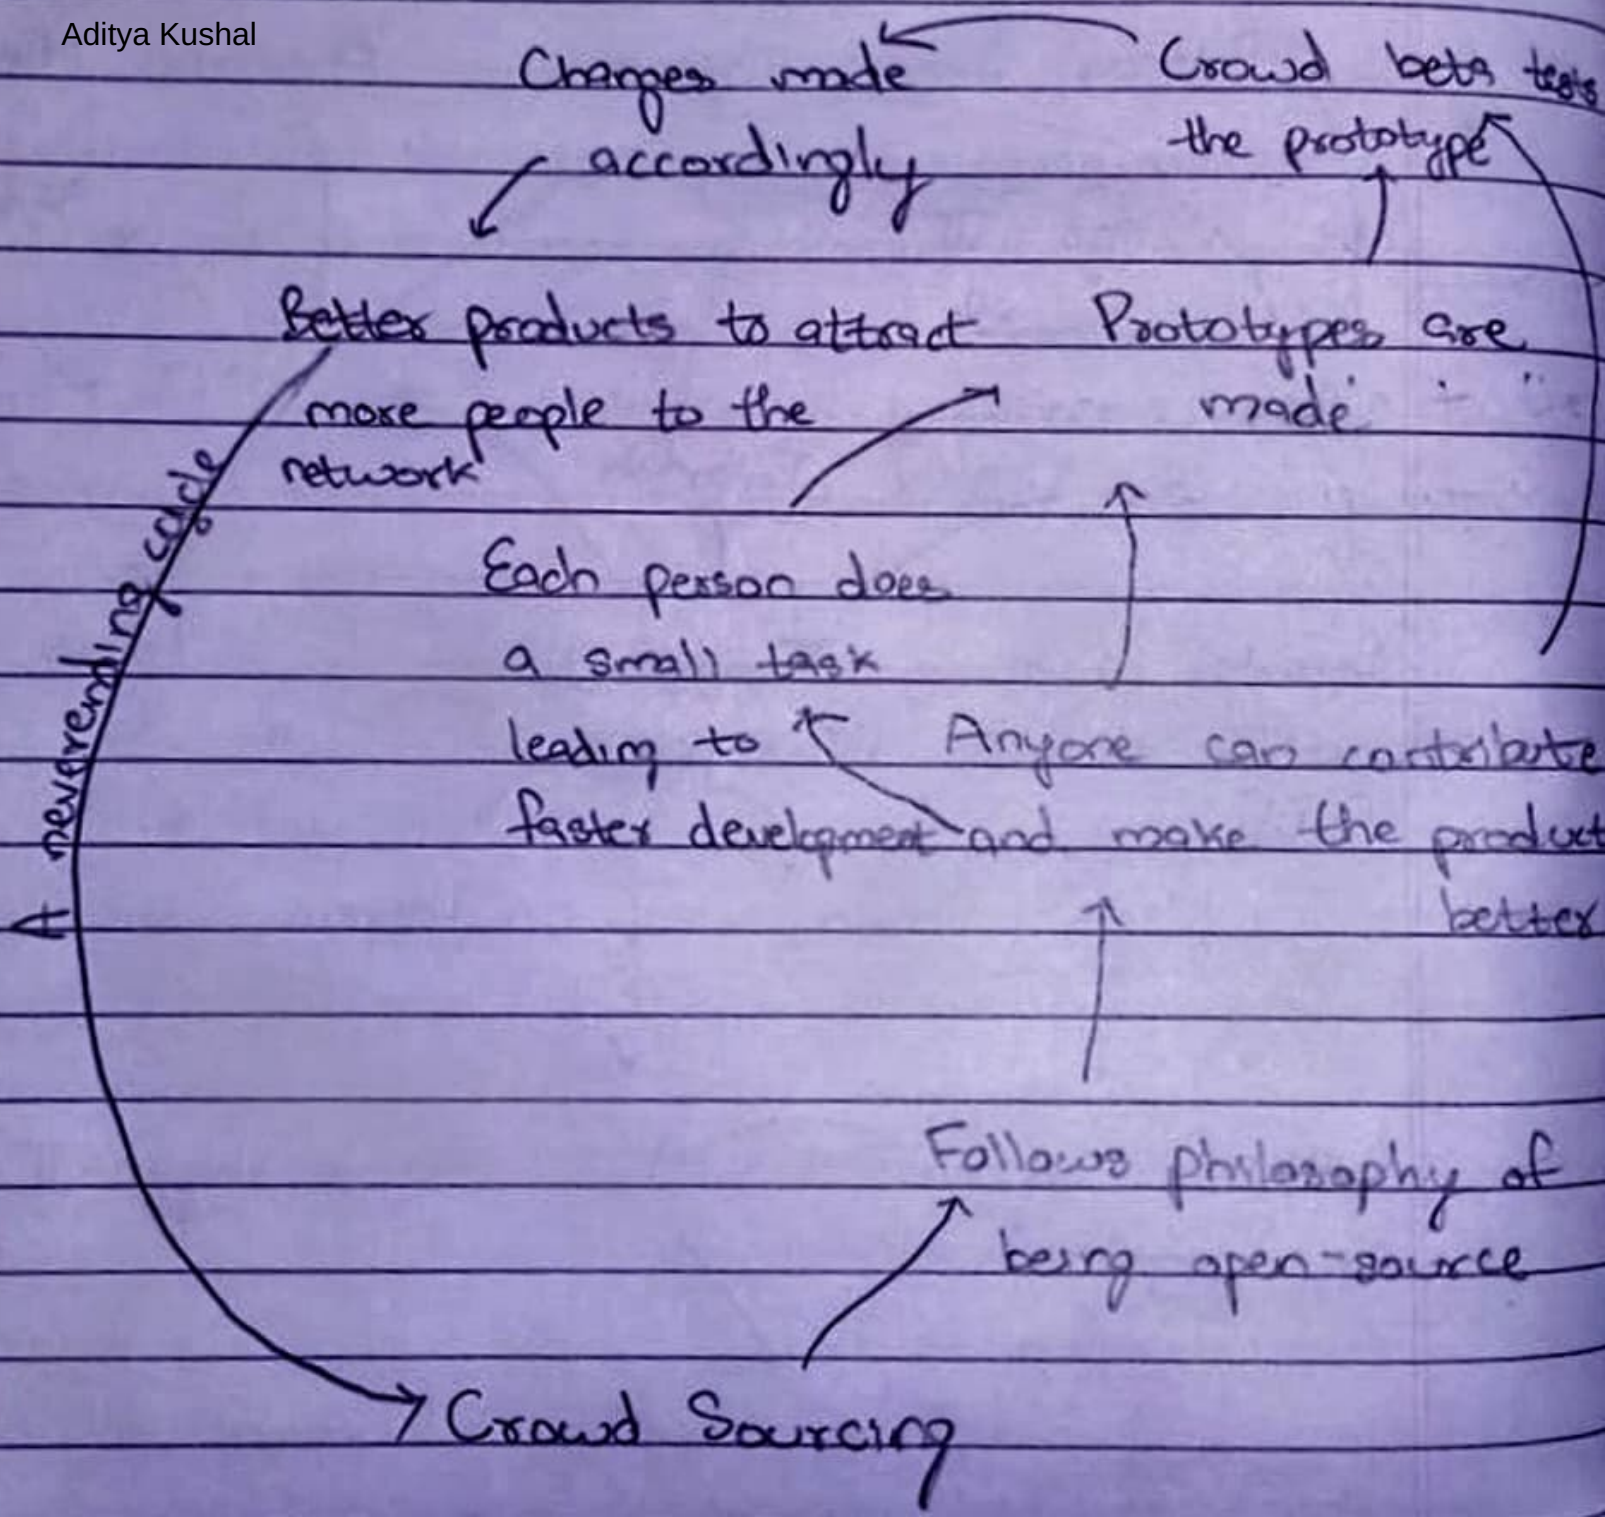

Aditya Kushal

Maana here shows that girls should not be sheltered and is the living embodiment of the new feminism. Maana

You should not shelter girls, and let them also solve problems as shown in the movie. Shelter

Girls have the same potential as boys, thus they have to be given the same opportunities to show themselves. Potential

Before
Machine gives wrong
answer, and
gets corrected

$1+1=3$

No,
 $1+1=2$

After
Machine learns from it's
mistake and gives the
right answer with help of
Machine learning

$1+1=2$

Brother,
 $1+1=?$

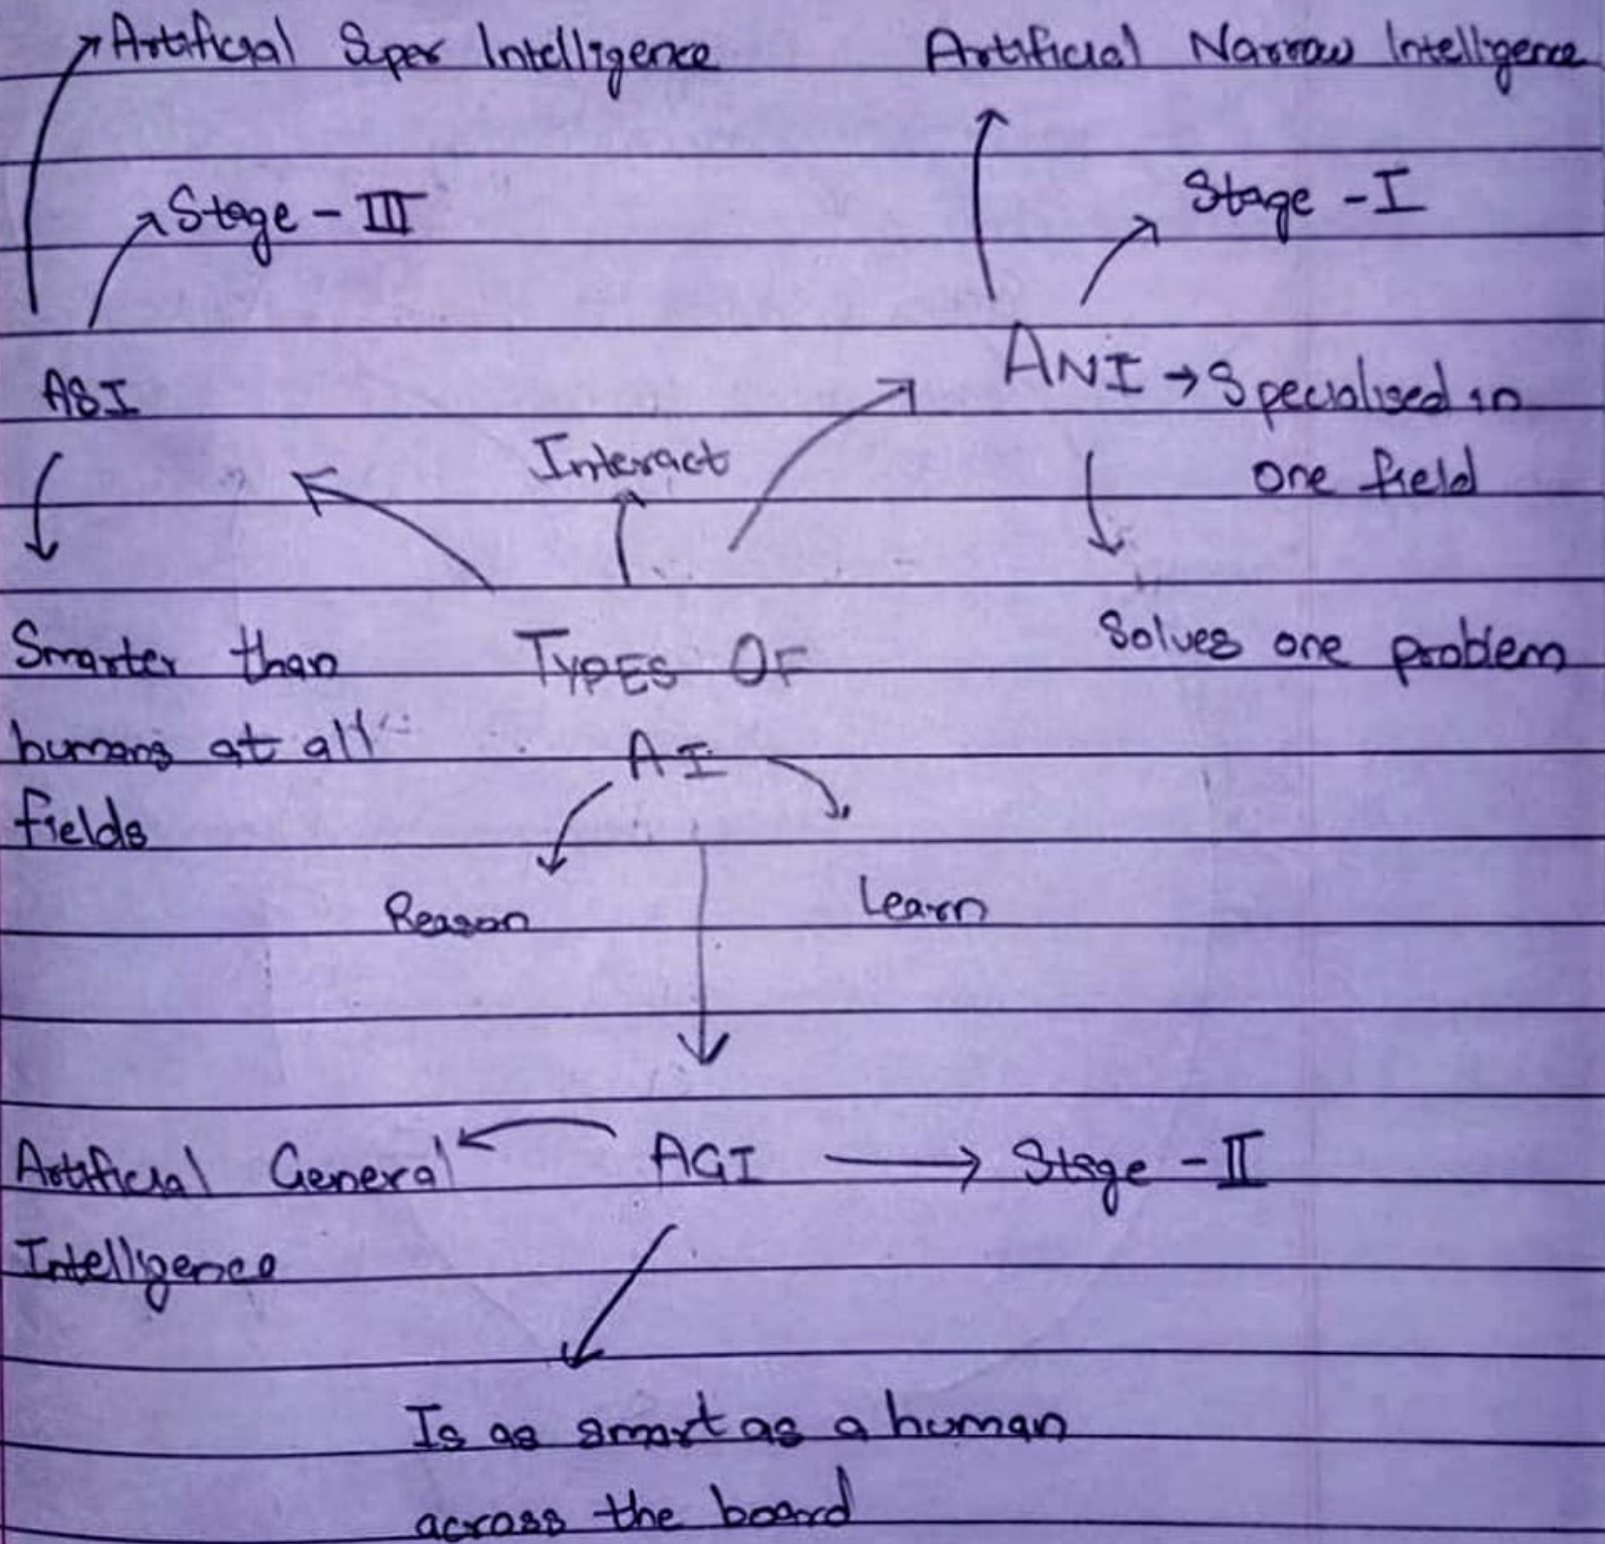

Reinforcement
learning

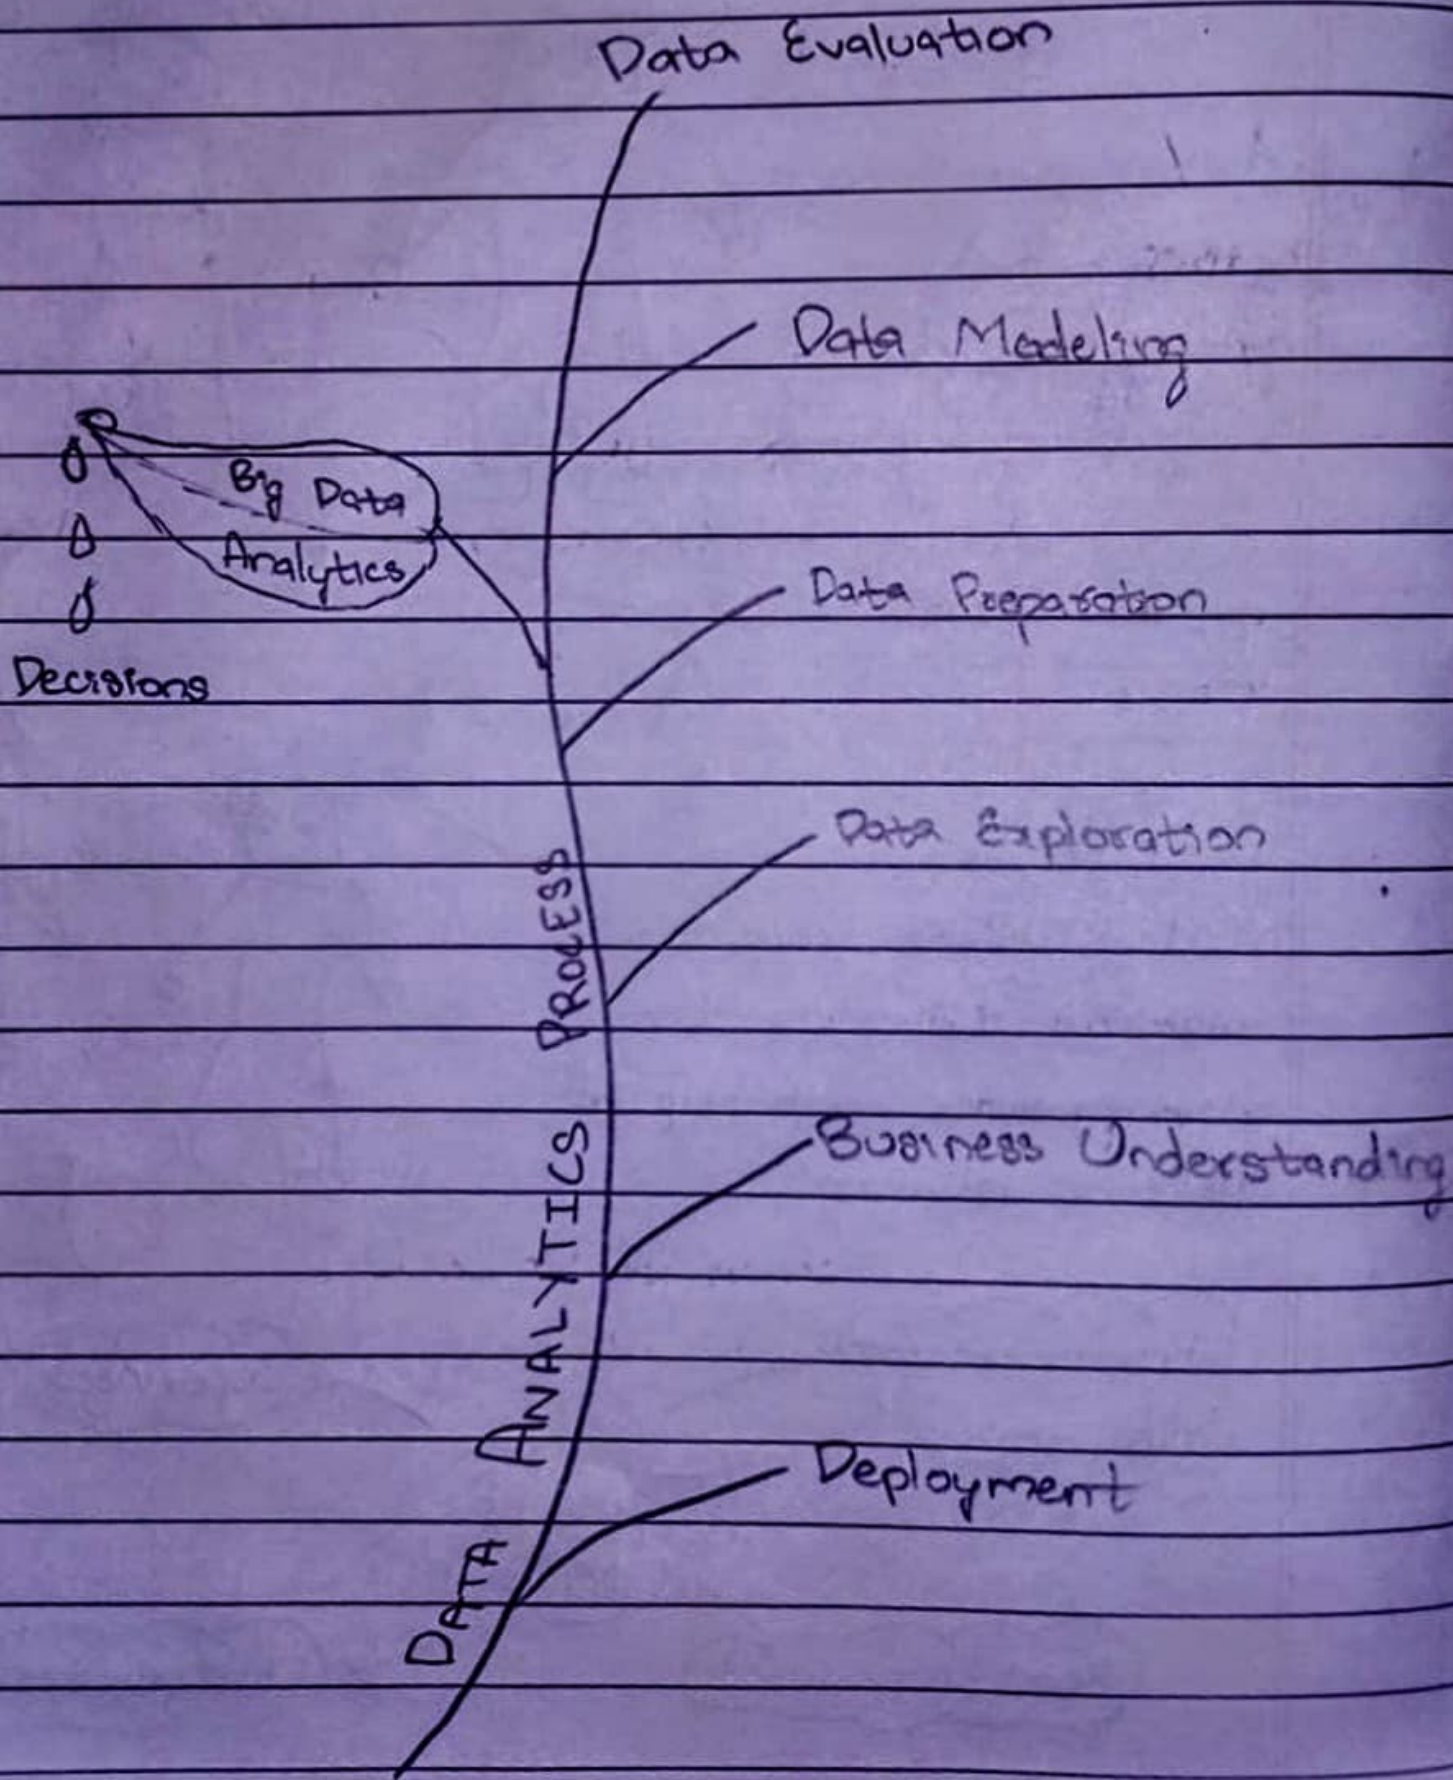

Supervised

Types of
ML

Semi-supervised

Unsupervised

The smart art graphic shows the minimum requirements to pursue the data science field.

Coding, Math, Data visualisation, Data pre-processing are the core requirements that are needed to pursue the field. Communication, Machine learning, Real world projects are some other skills that can be picked up to enhance the output of your data analysis. You also need to be genuine and should not manipulate the data for anyone's benefit.

Only give the truth of the analysis to the common folk out there.

Data Science Process

Aditya Kushal

Before starting the analysis, you need to first identify the business problem. Once it is identified, the next step is to acquire the data and prepare it for analysis. Model development is the next step after preparing the data, ~~and~~ ^{and} ~~then~~ ~~the~~ ~~data~~ ~~is~~ ~~used~~ ~~to~~ ~~apply~~ ~~the~~ ~~model~~ ~~and~~ ~~visualise~~ ~~the~~ ~~data~~ ~~and~~ ~~communicate~~ ~~your~~ ~~conclusion~~ ~~at~~ ~~the~~ ~~end~~ ~~of~~ ~~the~~ ~~analysis~~. Apply methodology such as ML to get an output. Finally, visualise the data and communicate your conclusion at the end of the analysis.

Data Science Lifecycle

Aditya Kushal

Start with having a good business understanding, identify the problem and it's possible solutions. Next is model building and data acquisition which can be done simultaneously or one after the other. If you start with Modeling, apply appropriate algorithms, and check the accuracy of the model. If you start with Data acquisition, acquire data from a reliable source, pre process it so that the model can be applied. Deployment is the next stage, check how the model performs, ~~and~~ if the client is satisfied and make changes accordingly. After
